---

## SUMMARY

- I'm a **frontend developer with hands-on experience building live interfaces, desktop simulations, and internal tools—not just school assignments**. I focus on clarity, structure, and usability, and I treat every feature like it's shipping to production. I learn fast, take feedback seriously, and ask the right questions to get things right. **I'm looking for a team that values clean code, sharp thinking, and fast growth**.

---

## EXPERIENCE

**NATIONAL UNIVERSITY MOA**                                                (2024 - Present)
- *App Developer*
- *UI/UX Designer*

**PC GREEN TRADING CENTER LAS PIÑAS**                                        (April 2024)
- *IT Operations Assistant*

**STI COLLEGE LAS PIÑAS**                                                    (2022 - 2024)
- *Frontend Developer*
- *UI/UX Designer*

---

## TECH STACK

- JavaScript, Tailwind CSS, React JS, TypeScript, Next.JS

---

## RECENT PROJECTS

**MARQUEE CINEMAS**
- *Streamlined POS simulation for theaters, enabling full control over tickets, movies, and concessions.*

**UNITY BANK CORPORATION**
- *Simulated banking app focused on user flow, transactions, and security logic.*

---

## CERTIFICATIONS

- Responsive Web Design (**freeCodeCamp**)
